

## DataPoint for Exchange Overview

DP Solutions, Inc. is proud to introduce the latest in our line of products, DataPoint for Exchange. DataPoint offers the best in secure, reliable email archival for Microsoft Exchange 2007 and 2010 Releases. With its ability to be installed on the existing Exchange Server or Personal Computers, it offers a light, portable, and powerful way to deploy an archiving solution for Open Records and Sarbanes Oxley Reporting.

### Always Safe.

Emails can contain anything – from correspondences between employees, to company information and critical corporate confidential data. Given the potential sensitivity of email content, we made sure that DataPoint offers a secure, robust archive solution that always keeps your emails safe and accessible.

### Always Light

With a light, intuitive user interface and a portable backend, DataPoint can be installed with any standard Exchange Email Server System. Installation is quick, easy, and user-friendly. You will spend less time worrying, and more time using our software. With DataPoint for Exchange, you can hit the ground running.

### Powerful Audit Options

DataPoint contains powerful, flexible tools to solve your email administration needs. With multi-categorical searching, keyword alerting to administrators, graphing, statistical analysis, and user utilities to control how archived emails are handled, you have everything you need. Everything you want to protect your email, and what is being sent on your email system comes standard.

### A Complete Compliance Solution

DataPoint provides a complete solution for email archiving and compliance. Our standalone software based solution provides all the tools you need to capture, store, and recover incoming, outgoing, and internal email. DataPoint's archiving solution provides options for secure thin client or web-based management utilities to quickly search and find any email which has traversed the system. Auditors and Administrators use DataPoint to save time and cost when searching thru massive email volumes. Whether you are an existing client looking to integrate our archiving technology into your environment or you rely on some other form of email system, DataPoint is the solution.

### Pricing

Unlike the other archiving offerings available, the DataPoint has nominal per-user licensing fees. This provides you with the most affordable and reliable email archiving solution available. You may email [orders@dpsol.com](mailto:orders@dpsol.com) to obtain pricing or to process your order.
